Enthusiastic, innovative, and driven Frontend Developer with nearly 3 and a half years of expertise in React Native and a total of 6 years in the software development industry. My passion lies in crafting captivating mobile applications that run flawlessly on iOS and Android platforms. My skill set encompasses an array of technologies, including JavaScript, TypeScript, React Native, Jest, React Native Testing Library, and MobX.

Throughout my dynamic career, I have honed my craft by contributing to diverse industries, ranging from accounting, airports, and e-commerce to AgTech and FinTech. My track record speaks for itself, as I have consistently delivered high-quality solutions that tackle complex challenges and provide seamless user experiences that leave users delighted. I am a forward-thinking problem solver, eager to take on new challenges and thrive in an environment that fosters growth and learning.

Now, I am actively seeking a company where I can continue my journey of professional development, push myself to new heights, and make a significant impact on challenging projects. If you are looking for a Frontend Developer who brings expertise, creativity, and a proven track record to your team,

I am excited to explore how I can contribute to your company's success and create remarkable user experiences together.

EXPERIENCE

Zinli, Frontend Developer (React Native CLI) — Panama/Venezuela — Oct, 2021 - Present

- Increased wallet capacity by fixing app bugs and improving unit test coverage using Jest and React Native Testing Library.
- Proposed the migration from JavaScript to TypeScript and removal of FlowType.
- Significantly reduced contact load waiting time for money transfer module from 1/3 min to approximately 5 seconds, handling up to 3k contacts.
- Implemented deep links functionality, generating 13 different deep links for various business requirements.
- Resolved impediment with deep web links in mail campaigns by implementing native code (Objective C) for configuring deep links in iOS. Adjust and Braze providers were used.
- Collaborated with the internal marketing team to create push notification advertising campaigns through content cards in the app's notification panel. Included internal and external redirections to boost sales.
- Developed badge feature for app icon notifications using Java for native Android and Objective C for native iOS.
Worked on creating new screens for the coupons and referrals module, collaborating with the Extole provider for client traction and tracking metrics.
- Currently involved in the initial phase of a chatbot side project, using OpenAI models to enable natural language queries about transaction data in the app's data lake. Aimed at facilitating non-technical department access to information.
Technologies: React Native CLI, MobX, Jest, React Native Testing Library, JavaScript, TypeScript, Python.

OCHO La Super App, Frontend Developer (React Native CLI)— Ven. — Jan, 2021 - Nov 2022

- I started in the company developing different APIs for all business models.
- High efficiency, leading performance, improved ideas and experience led me to be promoted to leader in mobile application development using the React Native Framework.
- Developed the Shopper App which has user registration, location tracking, orders history, real-time order reception in shops and clients. I am also was in charge of developing the new version of the main OCHO app on both Android and iOS (React Native CLI).
Technologies: React Native CLI, TypeScript, JavaScript, Slim, PHP, MySQL.

Wilklab Agency, React Native Developer (React Native Expo)— Ven/Arg—Feb, 2020 - Jun 2021

- I developed a mobile app in React Native Expo and Firebase for WhitePay Venezuela/Argentina/Peru/Uruguay/Chile/Colombia.
- The app has a ticket system and real-time chat for users and assessors of the company. App for both Android and iOS. (React Native Expo, Firebase).
Technologies: React Native CLI.
